PROFILE

I am a passionate web developer and software engineer keen on furthering my expertise in web development. With a background in software engineering, I bring valuable project experience and a desire to collaborate with motivated professionals in crafting innovative web solutions within a dynamic team.

PROJECTS

Job Portal 🔗

present

We implemented Agile tools, particularly Kanban, and developed the project using the Django framework for the backend, alongside Next.js 13, TypeScript, and Tailwind for the frontend

Autorent 🔗

01/2021 - 06/2021

Car Rental Platform in Algeria

This platform serves as a bridge between agencies and clients, aiding agencies in managing their car rental operations while enabling customers to book vehicles according to their requirements and inquire about new car models. It was developed using the Django framework
